Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention.

The use of numerals referring to figures would appear improper in US patent practice. Removal of these numerals from the claims is advised.

The use of CFB should be amended to circulating fluidized bed in claim 10.

The limitation "designing the cyclone system" in claim 1 is indefinite because applicants do not particularly point out how the system is modified to result in applicants' desired result of the fly ash escapes the cyclone system. How is it designed to do this? This limitation specifically defining the modification should be in the claim.

In claim 10, the terms "in order to match pressure conditions" are vague and indefinite? What are the pressure conditions being matched?

The term "sensible" heat would appear vague. Sensible heat? What does this mean?

The use of both gypsum and the formula CaSO_4 is redundant. Deletion of one of these terms in claim 12 is advised.

The Zhu et al. and Schmidt '754 patents have been cited of interest but would not appear to teach the instantly claimed invention.
